FREEDOM

16.12.17
NATIONAL
DEMONSTRATION

We are those women and men who cross the planet because of environmental, political and economic wrong policies. We cross walls, ideological borders and barbed wire.

We leave our lands and families because of ECB's and EU's irresponsible policies that close the labour market, income, and accommodation options, regardless of the geographical origin.

Stop talking about us, against us and for us. We are no longer prepared to be exploited and kicked out, or to be used for your electoral campaigns. We don't need your rhetoric. We need action, because the racism and the exploitation that we suffer every single day can't be stopped with charity or speculating on our lives.

Racism is developing against a background of unemployment, and social and cultural exclusion. That's why we need a change for anyone is struggling with deprivation and injustice.

Cuts on welfare and ghettoization of consistent segments of the population implicate the militarization of territories that are turned into silos of needs and injustice where migrants and refugees appear, with a camouflage, the accountables of social inequality.

On the basis of common objectives and sharing a continued effort, our stories intertwined, awareness that struggling

means, first of all, searching for justice and freedom of the whole population, regardless of the skin colour and the geographical origin.

We believe that the present legislation on this matter, in Italy (Bossi-Fini; Minniti-Orlando; Lupi Decree) as in Europe (Dublin III Regulation), is an obstacle to an adequate hospitality, to a social and working integration and to social justice.

We consider unacceptable that who was born and have grown in Italy still has a hard time to be recognized as Italian citizen and we believe that politics must realize a citizenship law for the alleged second generations.

We believe that reception centres are the first place where human exploitation begins, where the human being is invisible and without right, and people are invisible, both for the migrants and for operators. That's why regularization it's so important.

On the basis of a common ground built against racism and sexism, and fighting for social justice and free movement of persons, we decided to call National Demonstration that will take place on December 16th.

This demonstration will be made by US, those people that cross the globe and is forced every day to go through walls, barbed wire and to face the threats of the sea to survive. This will be our best chance to stand for our rights and provide a concrete platform.
